# Uncle Fester's Basic FreeNAS 9.10 Configuration Guide

## Introduction

This guide has been written with complete beginners to FreeNAS in mind (although some general computer knowledge is assumed).

Therefore, depending on your level of knowledge and experience, you probably won't need to read all the sections.

There is some Fester humour throughout the guide (or what passes for humour in Fester's very strange world). It is there to try and keep the user of this guide going until they reach the end. This is a very boring document. The humour will not be to everyone's taste. If you find it offensive just ignore it and move on; Fester means no harm.

## Aim and Scope of This Guide

This guide is for people who want or need to set up FreeNAS as quickly as possible with a minimum of fuss.

The aim is to provide all the information you need in one place to set up a basic FreeNAS server.

- It is not intended to teach or educate.
- It is no substitute for learning and understanding the FreeNAS OS.

It is no substitute for the excellent [official guide](#)

that accompanies the FreeNAS OS.

- It is my attempt to give something back to the FreeNAS community.

It is my hope that others will contribute, augment, update and completely replace parts of this guide so it can be a useful resource to all FreeNAS beginners. To more easily enable this, the guide is highly sectionalised and released under a Creative Commons Attribution license.

==== Disclaimer ====

This guide has been written by a FreeNAS complete beginner for complete beginners.

Proceed at your own risk. I will not be held responsible for anything that happens to your system, you, your hair, the real wood veneered floor, your prostate gland or the world in general. I take no responsibility for anything (just ask anyone who knows me).
