Global Configuration of Jails 1

Global Configuration of Jails

```
p { margin-bottom: 0.1in; direction: ltr; color: rgb(0, 0, 0); line-height: 120%; }p.western { font-family: "Times New Roman",serif; font-size: 12pt; }p.cjk { font-family: "Times New Roman",serif; font-size: 12pt; }p.cjl { font-family: "Times New Roman",serif; font-size: 12pt; }p.cjk { font-family: "Times New Roman",serif; font-size: 12pt; }p.cjl { font-family: "Times New Roman",serif; font-size: 12pt; }a:visited { color: rgb(128, 0, 128); }a.western:visited { }a.cjk:visited { }a.cjl:visited { }a:link { color: rgb(0, 0, 255); }
```

Before setting up any plugins on the server we must first configure the global settings for all Jails.

Go to the "Jails" page (1) and click on the "Configuration" button (2).

The screenshot shows the Jails configuration interface. The top navigation bar includes icons for Account, System, Tasks, Network, Storage, Directory, Sharing, Services, Plugins, Jails (circled in red with a '1' below it), Reporting, and Wizard. Below the navigation bar, there are buttons for Jails, Storage, Templates, Configuration (circled in red with a '2' next to it), and Add Jail. Below the buttons is a table with columns: Jail, IPv4 Address, Autostart, and Status. The table contains the text "No entry has been found".
